

Splash Fill Systems

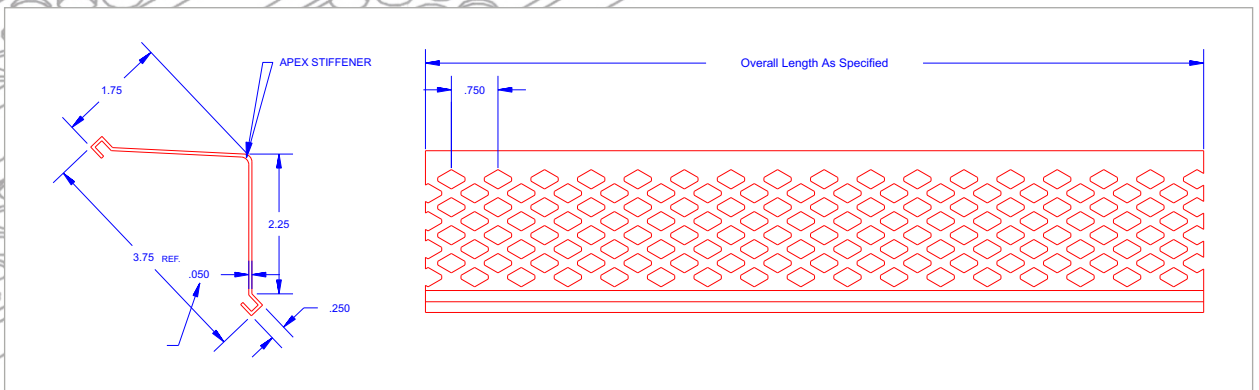

V-Bar Splash Fill Slats

V-Bar & Retainer Clip

C. E. Shepherd Company offers a choice of Splash Fill Slats to fit your needs. Shepherd high quality extruded PVC cooling tower fill slats are designed for both parallel and perpendicular installations, (most common in crossflow cooling tower applications). Rigid and strong, Shepherd Fill Slats are engineered for maximum efficiency with minimum power requirements.

Shepherd Fill Slats are available in two configurations: V-Bar or Gull Wing. V-Bar Fill, available in 4-inch width, is our low first cost option. V-Bar has been installed extensively both in the United States and abroad for decades.

Retainer Clips

Retainer clips manufactured from high quality, virtually unbreakable polypropylene secure the Shepherd Gull Wing or V-Bar Splash Fill slats to Shepherd Fill Slat Hangers. Shepherd Retainer Clips are available in 4" or 6" sizes.
